our design process

meet.
we meet & learn about your business and set goals for the project.

research.
we hit the books/internet to learn about your industry and your competitors. we do this to ensure you get the best visual solution possible.

sketch.
we sketch out our ideas so as to work efficiently and get to the proper visual solution.

III concepts.
we settle on our first draft design concepts. Usually 3; sometimes more; sometimes less.

present.
we present these concepts to you, explaining the rationale behind each and why they'll be successful.

revise
we ask you to choose one concept and focus on that. then we work on revising the concept so it meets the goals outlined and makes you happy. sometimes there's one revision round; sometimes two; rarely more.

deliver.
when we're all good to go, we deliver the files to you.

launch.
all of us let the world know about your new _____. excitement ensues.

we've worked on our design process to make your project run smoothly, with the best end result possible. this is how we do it at paper leaf design.

Customer Data Analysis

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularized in the 1960s with the release of Letterset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.
